

An Air Handling Unit a day, keeps...

Fläkt Woods delivers an air handling unit every day to a hospital somewhere in Europe. We understand you and know what you need.

Fläkt Woods has focused on environmental and hygiene issues for ventilation and air conditioning for many years.

We have been environmental approved to ISO 14000 since 1997. Our Air Handling Unit range EU 2000 has been certified to the stringent german VDI 6022 Hygien Standard since 2000.

Some specific AHU features for hospitals

- Withdrawable driptrays
- HEPA filter section
- External motors
- Flat belts

Econet[®] offers a hygienic and efficient heat recovery system with optimising control and waste heat and cooling utilisation.

Customised Environment[®] – Elea CARE

The Elea displacement diffuser series for the health care sector, with a newly developed absolute filtration technology. The built-in low resistance HEPA filter continuously cleans the supply and room air.
