

Massive Air Handling Units for Pharma Plant in Denmark

Fläkt Woods was awarded a pan European project to supply the air handling solutions on Biogen Idec pharmaceutical factory in Denmark.

■ FACTS

Customer:

Biogen Idec pharmaceutical factory in Denmark.

Need:

Optimal air handling solution with total flexibility concerning functions and options.

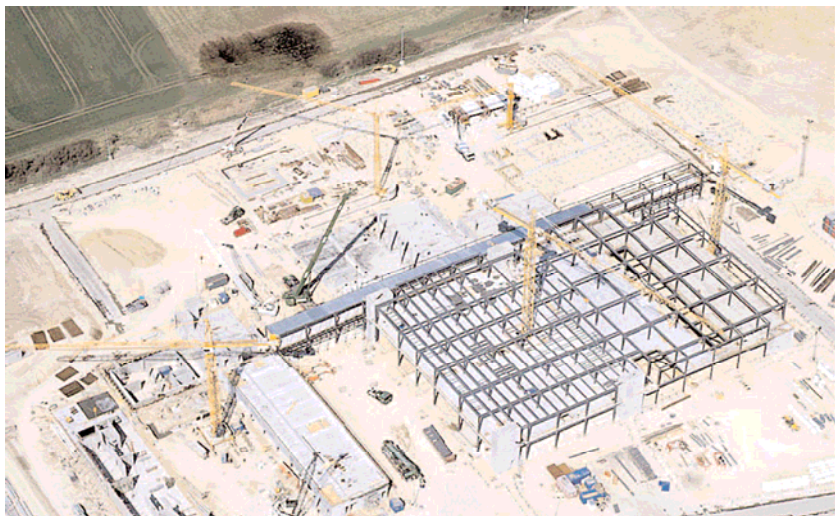

Solution:

23 Fläkt Woods modular air handling units.

We deliver the best individual solution for any customer

The comprehensive range of Air Handling Units that we offer allows us to deliver the best individual solution for any customer. Fläkt Woods R&D focuses on reducing energy consumption and creating complete air handling system solutions with controls. Our experience in the pharmaceutical market makes us the perfect partner for such applications.

Modular air handling units offer full flexibility allowing different sizes and functions to be combined to meet virtually any air handling requirement.

Our modular product range is modern and highly-specified, designed for customers with high demand on quality and energy efficiency. The unit can be optimized for thermal, acoustic and/or hygienic requirements.

Computer-aided selection using a program based on a series of highly complex algorithms allows us to optimize selection and ensure that the unit offered conforms to the customer's requirements.

Biogen Idec

Fläkt Woods was awarded a pan European project to supply the air handling solutions on Biogen Idec 200 million pharmaceutical factory in Denmark. The contract was a complete AHU turnkey contract and proves the European capabilities of the Fläkt Woods Group.

The contract was handled in the UK, manufactured in Sweden, and installed in Denmark, on behalf of Jacobs Engineering of Reading, UK.

Appointed contractors carried out the installation at Hillerod and were available throughout the warranty period of the equipment. The new manufacturing facility required 23 air handling units from the Company's EU range, as part of a contract valued at nearly 700,000. The EU modular air handling unit gives total flexibility with its wide range of functions and options providing the optimum air handling solution.

Manufacturing facility

The facility is one of the largest facilities of its kind in the world covering 34,000 m², and will be used to manufacture multiple products. This project is the first phase of the company's development in the 60 acre Hillerod site.

The EU range

The EU range offers all needed functionality and high degree of flexibility. The sturdy frame members and corner pieces form a very stable framework which is well suited to the full range of sizes.

Fläkt Woods Group

Fläkt Woods is a global company providing solutions for ventilation and air treatment for buildings as well as fan solutions for Industry and Infrastructure applications.
