■ FACTS

Customer:

GS Engineering & Construction
(formerly LG E&C)

Need:

Energy efficient ventilation solution that can meet any air handling requirement.

Solution:

Fläkt Woods' EU air handling units

Air Handling Units for the exciting new K-Project in Korea

Fläkt Woods Korea has been awarded contracts worth over 3 MEUR to supply 96 sets of Air Handling Units for K-PROJECT in Korea.

The customer in the project is GS Engineering & Construction (formerly LG E&C), a top Korean partner for architecture, civil engineering, housing and plant industry. The contract is one of the largest undertaken by Fläkt Woods Korea.

The K-PROJECT consists of building a commercial centre in Yeongdeungpo, Seoul. The area is within a close distance from the National Assembly, national broadcasting studios, and the booming financial district in Korea.

There are many new shopping areas in Korea, including major department stores such as Kyung bang Phil, Lotte, ShinSeGye, other traditional markets and subway malls. The shopping population amounts to one million people shopping per day.

The ambitious plan of GS E&C is to create a global Hybrid Mall (department store, hotel, office 1&2, UEC, and multiplex (total 60,390 m2).

Fläkt Woods Korea was able to get the order thanks to their good reputation in quality in the local market. The sales personnel kept constant contact with the developers during three years from the design initiative. The Design & Technical staff were also offered timely support during the entire project.

The customers (both the project owner and the construction company) are convinced that Fläkt Woods Korea is able to manage this big project, while maintaining good quality and keeping up with the construction schedule.

Fläkt Woods Korea is hoping to get a further order of AHU Fans for Office 1&2 and the hotel that is included in the project.

The EU range

The EU range offers all needed functionality and high degree of flexibility. The sturdy frame members and corner pieces form a very stable framework which is well suited to the full range of sizes.

Fläkt Woods Group

Fläkt Woods is a global company providing solutions for ventilation and air treatment for buildings as well as fan solutions for Industry and Infrastructure applications.
