Fläkt Woods has received a prestigious order worth over €6.5 million. The order comprises manufacturing of air-handling units for three large cruise liners. The air-handling units will be delivered from October 2007 until the end of 2009.

■ FACTS

Customer:

Fincantieri Trieste

Need:

Providing three 2260 passenger cruise liners with efficient air handling units designed to meet almost every demand.

Solution:

74 specially designed EUMM to each cruise liner.

Cruise liner passengers will enjoy Fläkt Woods' ventilation

Fläkt Woods has received a prestigious order worth over €6.5 million. The order comprises manufacturing of air-handling units for three large cruise liners. The air-handling units will be delivered from October 2007 until the end of 2009.

The units EUMM are specially designed with all conceivable functions to meet almost every demand. In all, 74 units will be delivered to each cruise liner. Fläkt Woods' production of air-handling units is situated in Jönköping, whereas some components are produced in other factories within the group, mainly in Sweden and Finland.

Strategically important order

The order is strategically important; it is the largest supply of units from Fläkt Woods to the Italian ship and cruise liner industry since 1996. The order will improve Fläkt Woods' chances to receive more orders from the strong and expansive cruise liner business with shipyard capacity concentrated to Europe.

Fläkt Woods' client Scanalmare AB, a company within Fläkt Marine Group AB, has sold the project through the German Marine HVAC and Installation Company Imtech Deutschland GmbH & Co.KG Schiffbau/Dockbautechnik. These units represent an important part of their orders received from Fincantieri Trieste Italy. The ships will be 292 metres in length and they are designed to carry 2260 passengers and a crew of approx. 900 persons.

Leading supplier even stronger

"This order strengthens the position of Fläkt Woods Group's as being the leading supplier of air-handling/-distribution products. Other equipment and materials developed and manufactured by Fläkt Woods Group benefit from this as these products are necessary in order to provide products to build complete HVAC systems. We will reinforce our organisation with more employees in order to meet the sales demands on the growing segments Marine/Oil & Gas", says Mikael Karlson, Marine/Oil & Gas Applications Manager, Fläkt Woods Group

The EU range

The EU range offers all needed functionality and high degree of flexibility. The sturdy frame members and corner pieces form a very stable framework which is well suited to the full range of sizes.

Fläkt Woods Group

Fläkt Woods is a global company providing solutions for ventilation and air treatment for buildings as well as fan solutions for Industry and Infrastructure applications.
